

We are now offering an exciting new
Phlebotomy Refresher Course

for your licensed clinical staff

We have created a flexible two-evening, two-hour or one-evening, four-hour course held any evening or weekend to fit your schedule

This course will refresh and review your staff's phlebotomy knowledge, skills and technique, while giving them new confidence in their patient care

At Oregon Medical Training we believe in safety being first, and we want to make sure that students walk away knowing how to keep both themselves and the patient safe. Additional topics covered include (but not limited to):

- Basic phlebotomy techniques & phlebotomy bedside manner
- Best patient identification practices
- How to utilize common phlebotomy supplies and safety devices
- Phlebotomy tubes, proper Order of Draw and inversions
- Proper veins for venipuncture and associated risks with each site including holding/anchoring methods
- Most common phlebotomy mistakes and how to prevent or correct them
- Avoiding erroneous results
- Processing, handling, and centrifuging specimens
- Difficult patients and advanced techniques, including proper redirection of a needle upon a failed venipuncture when appropriate

Sarah Stinchcomb, MLA(ASCP) is our Phlebotomy Refresher Course Instructor, and she brings to our program over 13 years of Phlebotomy Instruction, in addition to her extensive clinical knowledge and skills from her own career in Phlebotomy and Specimen Processing experience.

Our new Phlebotomy Refresher Course can be tailored to the needs of the group in attendance such as the experience level of the attendees, or it can focus on a few particular topics of concern. Please call (541-343-3100) or email (admin@orphleb.com) DeAnna Harrell, Administrator of Oregon Medical Training, to schedule a Phlebotomy Refresher Course for your clinical staff today.
